(69.5%)

Projects: -

❑ E-commerce Website -

- Led the frontend development of a scalable e-commerce platform using React.js and Redux. Collaborated with the design team to create an intuitive user interface that enhances the shopping experience. Implemented features such as product listing, filtering, and sorting, as well as a user-friendly shopping cart and checkout process. Integrated with RESTful APIs to handle product data, user authentication, and payment processing. Conducted extensive testing and debugging to ensure a seamless user experience across different devices and screen sizes.
 - Setting up the project structure.
 - Creating new screens and their functionalities in React.js.
 - Creating solutions for user-friendly experiences and designs.
 - Dev-bug fixing.

❑ To Do Web Application

- A web application built to user can add task, read task, update and also delete task.
 - Creating in Frontend React js.
 - Authentication: JSON Web Tokens (JWT), bcrypt
 - Handling the backend changes in Node.js
 - Database used in MongoDB

❑ Portfolio Website

- Developed a responsive and interactive personal portfolio website using HTML, CSS, and JavaScript. Implemented a clean and modern design to showcase my projects, skills, and professional experience. Utilized CSS animations and JavaScript for smooth scrolling and dynamic content loading. Ensured cross-browser compatibility and optimized performance for various devices. Integrated a contact form with email functionality to allow potential clients and employers to reach out directly.
